

CYBER SECURITY ASSESSMENTS

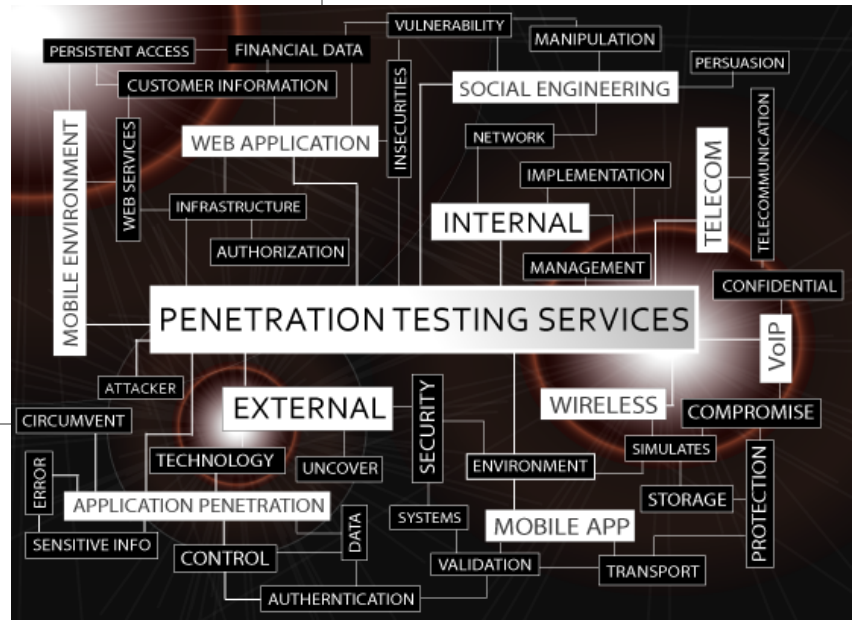

When it comes to cyber security, what you don't know CAN and WILL hurt you.

MAD Security identifies security weaknesses the same way an attacker would — by compromising them. This enables you to better understand and ultimately minimize the cyber security risk associated with your business thereby making your organization stronger and more resilient to attacks.

< PENETRATION TESTING />

Our penetration testing methodology, tools, and techniques are proven industry best practices and standards, including:

- NIST 800-115
- ISECOM's OSSTMM
- ISSAF from the OISSG
- PTES
- OWASP Testing Guide

< ADDITIONAL SERVICES />

- Red Team Exercises
- Security Gap Assessments
- Incident Response Assessments
- Security Product and Technology Testing
- Security Operations Assessments
- Vulnerability Assessments and Scanning
- Cloud Security Assessments
